

THE BIO

CHECK-UP

**AN
APPROACH
TO ORAL
HEALTH
THAT
CHANGES
EVERYTHING.**

A new area in oral medicine

Bio check-up & personalized targeted therapies are meeting expectations of a growing number of patients looking for a more effective, and less invasive approach to their oral health.

The focus of dental professionals should not be limited to dental cavities and bite disorders but also be on periodontitis (gum disease), oral cancer and sleep apnea, that have a dramatic impact on patients' overall health.

Reestablishing protective bacterial equilibrium or symbiosis is essential for long term results and is a core part of our approach.

This offers includes

CHF 2050.-

- Full oral examination: including examination of teeth/Gum/oral mucosa/bite
